## COURTS MANAGEMENT SYSTEM

### Introduction:

The Courts Management System is a comprehensive platform designed to modernize and streamline court operations. It integrates case management, scheduling, and documentation into a unified system, improving efficiency and accuracy. This system aims to enhance the judicial process by providing a user-friendly interface for court staff, legal professionals, and the public.

### Objectives:

1. Centralize and automate court processes to reduce errors and overhead.
2. Provide real-time access to case information for better transparency.
3. Enhance efficiency and speed of court proceedings for all users.
